

Misbourne Greenway: construction bulletin

End of November 2023

Overview

The Misbourne Greenway is a proposed walking and cycling route between Wendover and Uxbridge, Buckinghamshire. The main route through the valley is the A413, which is too busy and traffic speed too high to be an attractive and safe route for people travelling actively on foot, cycle or wheels.

The route realises part of the broader vision for a Buckinghamshire Greenway walking and cycling route running north to south across the whole county from Brackley to the Colne Valley.

Active travel charity Sustrans has been leading the design and build of the project to deliver a 4-kilometre section of this route between Dunsmore Lane, Wendover and Aylesbury Road, Great Missenden. Support has been provided from the Chiltern Society, Buckinghamshire Council, Network Rail and Greenways and Cyclerooutes.

This section is funded by the Department for Transport (DfT) and is part of Sustrans' ongoing programme to enhance the National Cycle Network (NCN).

At the start of February 2023, we secured extra funding to bring the Firecrest fields section in scope for this phase of work. This extra funding will come from the Chilterns AONB HS2 Review Group – a panel of local organisations that administers DfT funds for locally beneficial projects. More information and background about the Group can be found here:

<https://www.chilternsaonb.org/what-we-do/hs2/hs2-review-group/>

In October 2023, we agreed a contribution from Chiltern Railways Community Investment Fund towards signage and seating on the route.

Overview map

The map overlay shows the route, highlighting key elements and progress made to date.

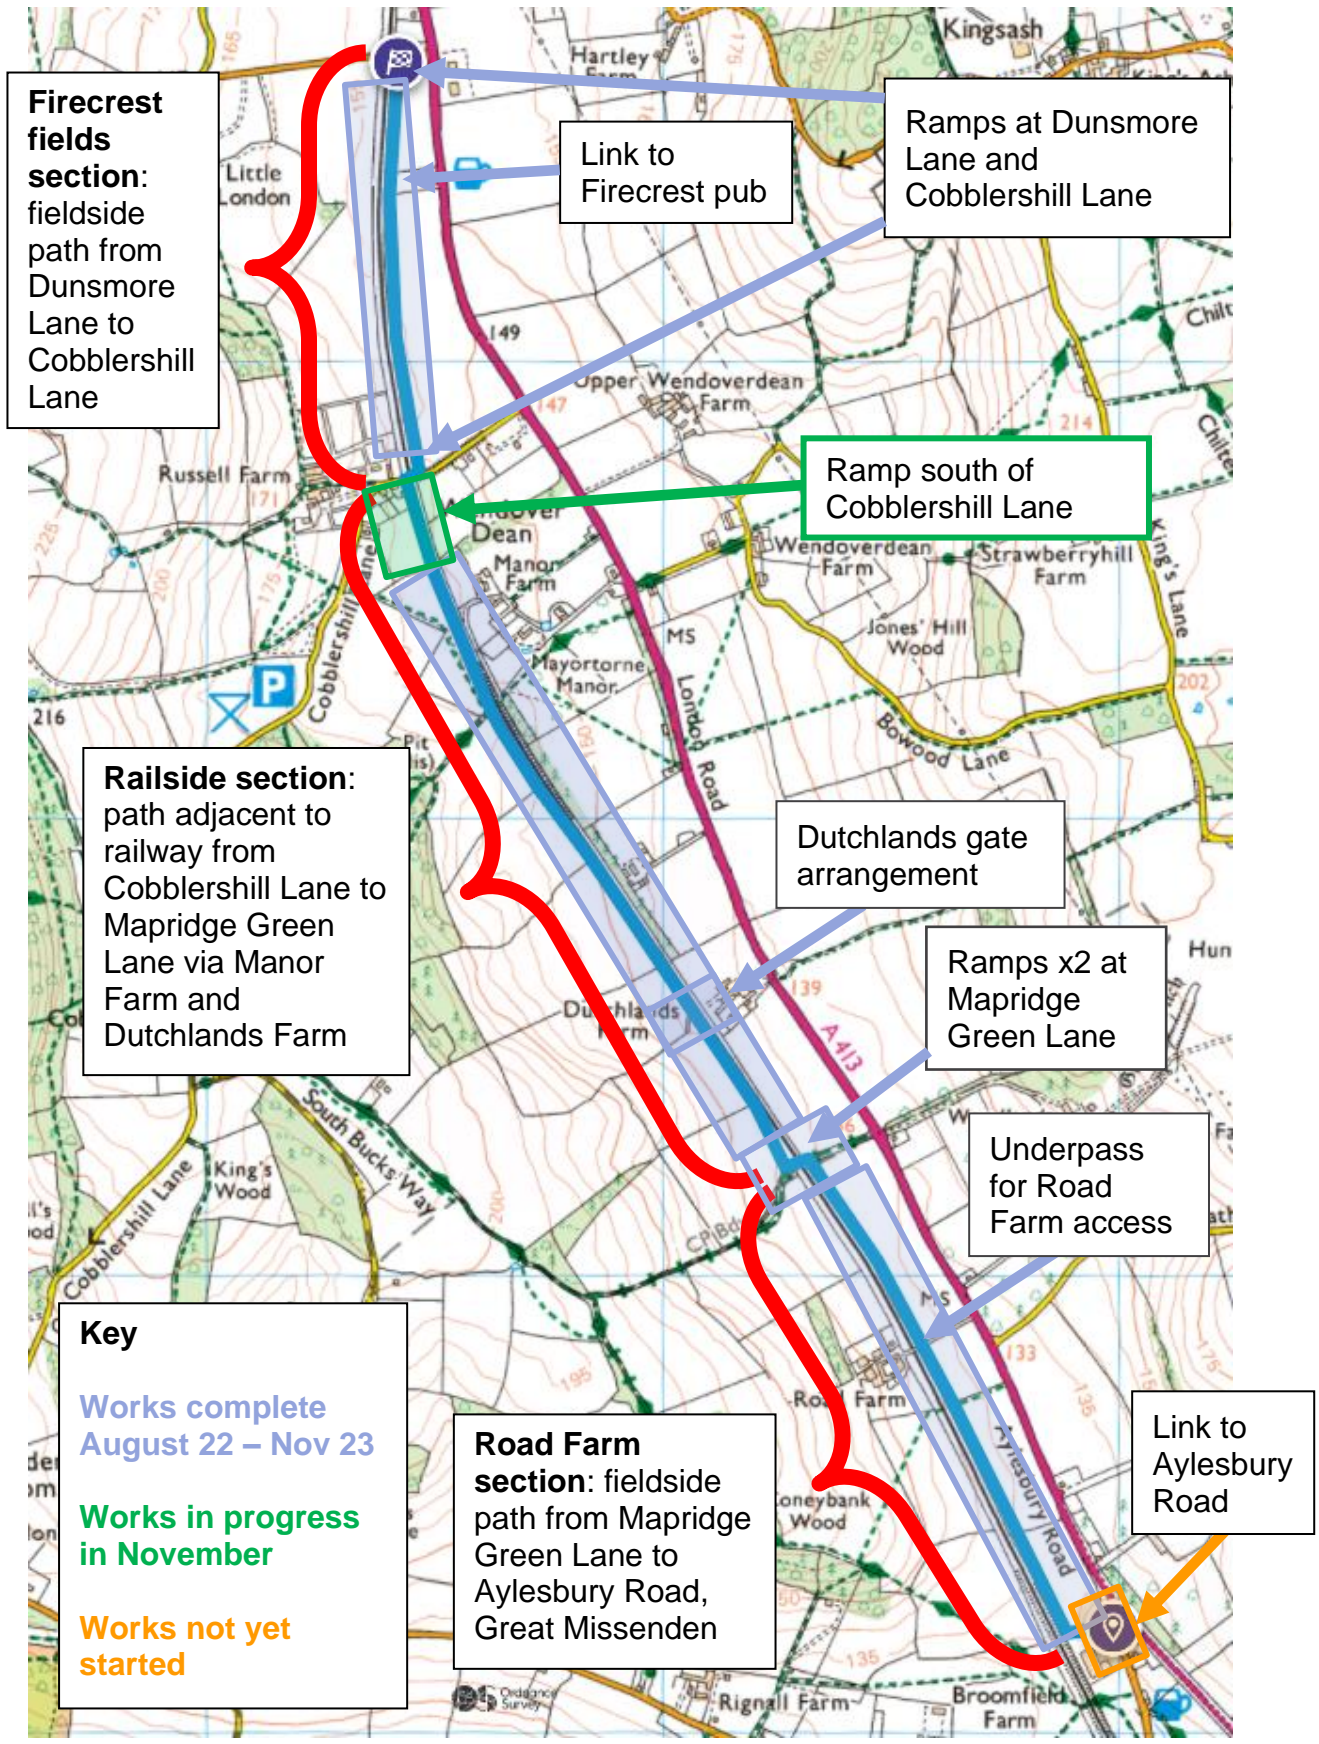

Progress update

November:

- Works commence on ramp at Cobblershill Lane (south)

Works planned for coming months

December:

- Continue works on ramp at Cobblershill Lane (south)

January 2024 onwards:

- Finalise link to Aylesbury Road (Great Missenden)

Please note, the path will not be open to the public until works along the whole 4km length are complete. We will provide more details in due course.
