

Misbourne Greenway: construction bulletin

End of September 2022

Overview

The Misbourne Greenway is a proposed walking and cycling route between Wendover and Uxbridge, Buckinghamshire. The main route through the valley is the A413, which is too busy and traffic speed too high to be an attractive and safe route for people travelling actively on foot, cycle or wheels.

The route realises part of the broader vision for a Buckinghamshire Greenway walking and cycling route running north to south across the whole county from Brackley to the Colne Valley.

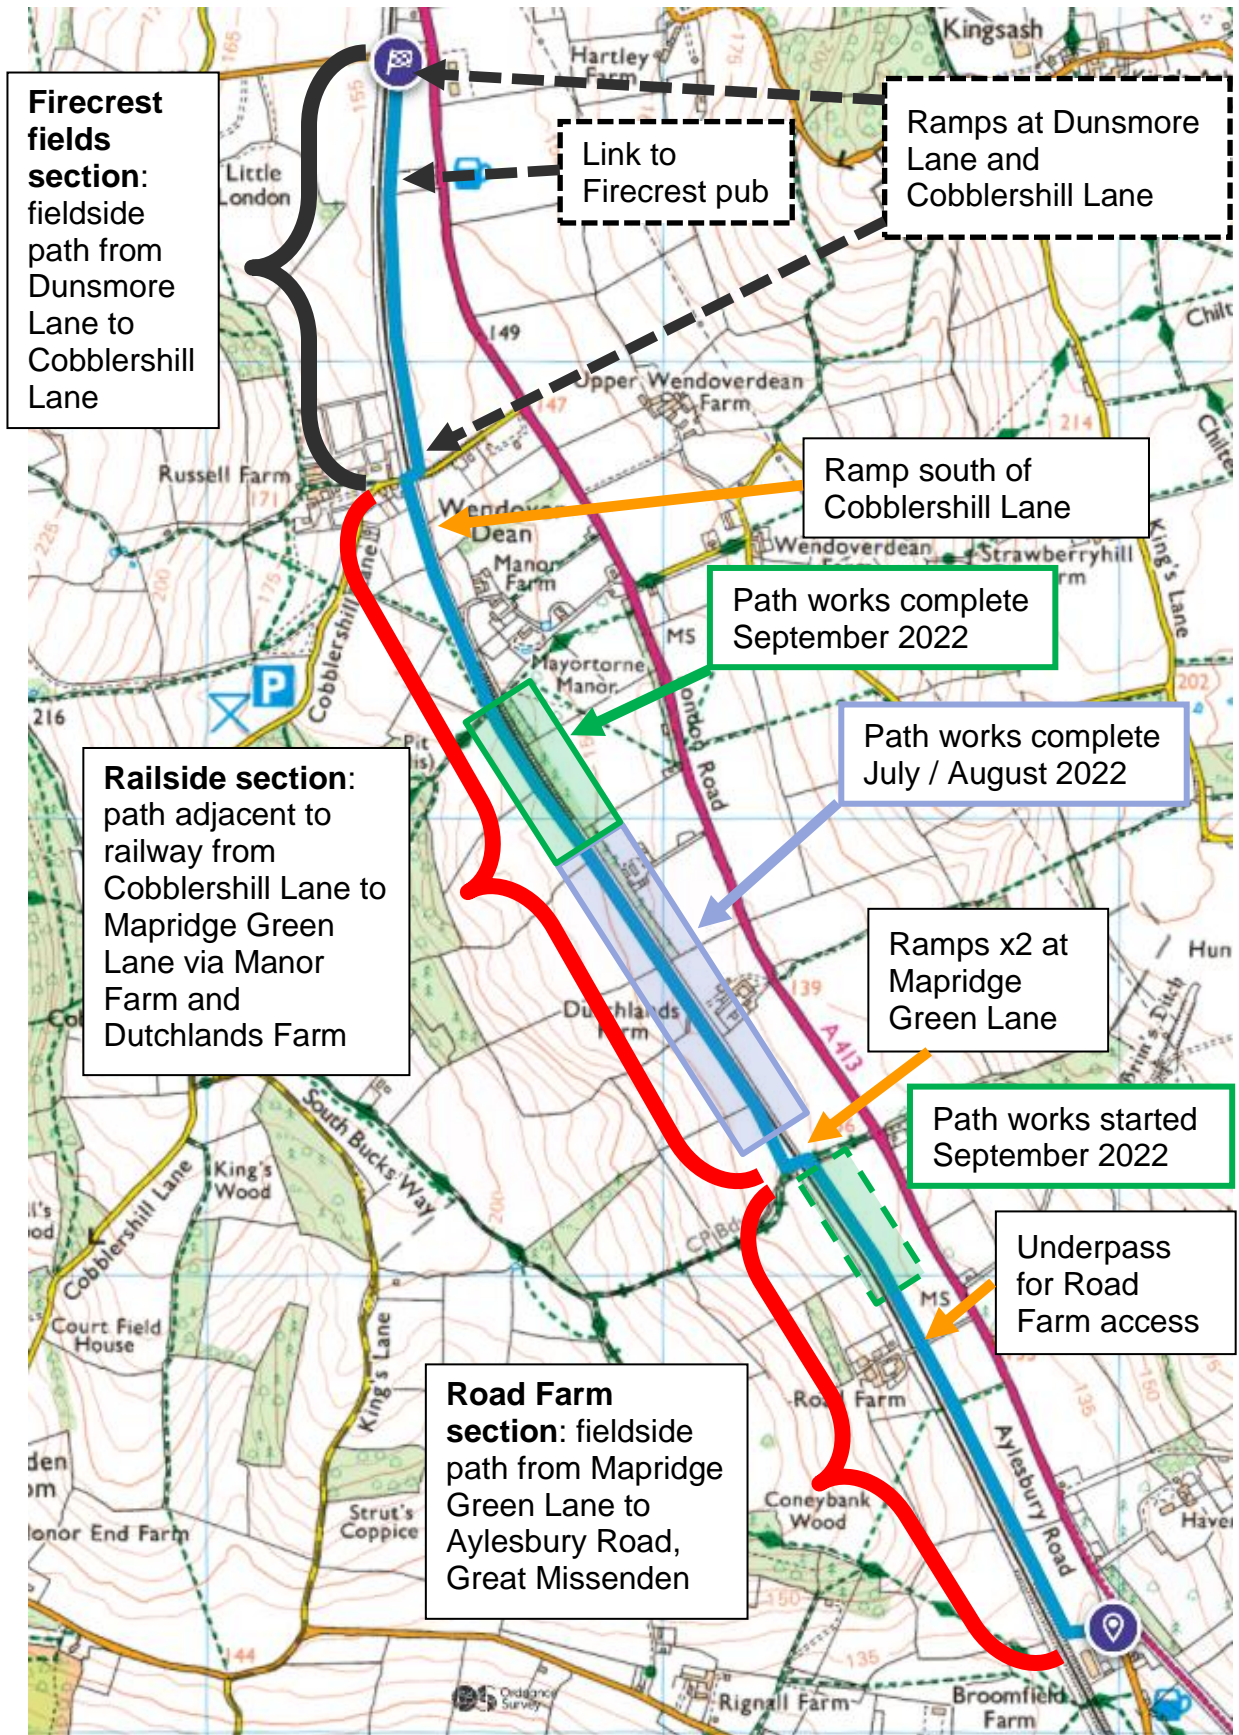

Active travel charity Sustrans has been leading the design and build of the project to deliver a 4-kilometre section of this route between Dunsmore Lane, Wendover and Aylesbury Road, Great Missenden. Support has been provided from the Chiltern Society, Buckinghamshire Council, Network Rail and Greenways and Cycleroles.

This section is funded by the Department for Transport (DfT) and delivered as part of Sustrans' ongoing programme to enhance the National Cycle Network (NCN).

Overview map

The map overleaf shows the route to be constructed, highlighting key elements.

Note: the northernmost section between Dunsmore Lane and Cobblers Hill Lane – Firecrest fields – will not be delivered within this phase of the project. We are working hard to find additional funding to deliver this section as soon as possible. This section is shown on the following map in grey.

Construction is planned to continue until early 2023.

Progress update

September:

- Path works continued on railside section, working north from Mapridge Green Lane, and reached Manor Farm.
- Path works commenced on Road Farm section
- Network Rail began railside fencing work on Road Farm section

Work continues on the first stretch of the Misbourne Greenway

Works planned for coming months

October:

- Continue path works on Road Farm section
- Install Road Farm underpass
- Network Rail continue railside fencing work on Road Farm section

November – December:

- Phasing of elements to be confirmed.
